**FOR IMMEDIATE RELEASE**

**Myint & Associates Telecommunications Successfully Enters into Colocation Resale Agreement with NTT Communications**

**02 June 2017, YANGON** – Myint & Associates Telecommunications Ltd. (Myint & Associates Telecoms) have entered into a resale agreement together with NTT Communications Ltd. (NTT Communications). The agreement will enable NTT Communications to resell server colocation space, available from Myint & Associates Data Center (owned and developed by Myint & Associates Telecoms), to their ICT clients and customers within Myanmar as well as the Southeast Asian region. NTT Communications will undertake sales of server colocation space under a new brand name referred to as Kamayut Data Center. The initiative will enhance Myint & Associates Data Center's services to extend outside of Myanmar, leveraging NTT Communication's reputable brand name and international clientele. The approach also enables NTT Communications to further expand their data center services in the Asia-Pacific region in a rapid and practical manner. Despite the collaboration with NTT Communications Ltd., one of the internet service providing companies, M&A Data Center will remain as a carrier-neutral data center.

Data Centers are fast becoming the standard for use by small businesses, enterprises, financial institutions (banks and the stock market), and by government ministries. Constructing one's own facility to store digital data is both costly to build and develop, as well as challenging to adequately maintain. Outsourcing the storage of digital data to an independent external data center is more cost effective. Moreover, digital data is also kept in an accessible, secure, and reliable environment. Typically, service level agreements (SLAs) are executed between the data center and the client to ensure that the client's expectations are clearly achieved. Furthermore, SLAs include penalties that the data center will incur should the agreed services expectations are not met.

Myint & Associates Data Center, built and operated by Myint & Associates Telecoms, is Myanmar's first and only data center that has received Tier III Design Certification from the Uptime Institute. Uptime Institute is the global data center authority based in the United States. Now in operation for 2 years, Myint & Associates Data Center is a

carrier neutral data center located at the Vantage Tower, the country's first Grade A commercial property, and is hosted in a facility designed to withstand earthquakes of up to a magnitude of 7.2 on the Richter scale. With capacity to provide up to 90 racks of server colocation space, Myint & Associates Data Center also offers double redundant power systems, temperature as well as humidity controls. The operations are managed from the facilities own state-of-the-art network operations center. The facility offers 99.99% operational time service guarantee (uptime). Such concurrently maintainable design allows for any of its components to undergo any form of maintenance even while the facility is in operation.

### About Myint & Associates Telecommunications

Myint & Associates Telecommunications Ltd. (Myint & Associates Telecoms) is the information technology arm of the MPRL E&P Group of Companies. Within the information technology infrastructure space, the company is currently the leader in terms of data center design, development, commissioning, and operations in Myanmar. Myint & Associates Telecoms also provides cloud computing and virtual private computing services to customers seeking the highest standards of information technology solutions and services.

### About NTT Communications Corporation

NTT Communications provides consultancy, architecture, security and cloud services to optimize the information and communications technology (ICT) environments of enterprises. These offerings are backed by the company's worldwide infrastructure, including the leading global Tier-1 IP network, the Arcstar Universal One™ VPN network reaching 196 countries/regions, and over 140 secure data centers worldwide. NTT Communications' solutions leverage the global resources of the NTT Group of Companies including Dimension Data, NTT DOCOMO and NTT DATA.
